AMENDMENT TO THE CLAIMS

This listing replaces all prior versions, and listings, of claims in the application:

Listing Of Claims:

1-19. (Canceled)

20. (Previously Presented) A method for delivering a customized offer for sale of an item of merchandise from a retailer proximate a user, comprising:

obtaining information identifying an item of merchandise that the user desires to purchase;

determining a physical location of the user;

querying a computerized network of information utilizing a query based on the information identifying the item of merchandise that the user desires to purchase and the physical location of the user;

receiving from a retailer-based agent in response to the query the customized offer for sale of an item of merchandise that is offered for sale from a retailer proximate the user, the item of merchandise that is offered for sale being associated with the item of merchandise that the user desires to purchase; and

displaying the customized offer and a physical location of the retailer.

21. (Previously Presented) The method of claim 20, further comprising obtaining information identifying a shopping list comprising a plurality of items of merchandise from the user.

22. (Previously Presented) The method of claim 21, further comprising querying a computerized network of information utilizing a query based on the information identifying the shopping list of items of merchandise and the physical location of the user.

23. (Previously Presented) The method of claim 21, wherein said shopping list is generated by the user at a location remote from the retailer.

24. (Previously Presented) The method of claim 20, further comprising displaying a list of items of merchandise available at the retailer and the prices associated therewith.

25. (Previously Presented) The method of claim 20, further comprising determining the closest retailers surrounding the user, and suggesting items of merchandise for sale at the closest retailers surrounding the user.

26. (Previously Presented) The method of claim 20, wherein the computerized network of information is the Internet.

27. (Previously Presented) The method of claim 20, further comprising alerting the user to the best local price.

28. (Currently Amended) An apparatus that delivers a customized offer for sale of an item of merchandise from a retailer proximate a user, comprising:

a processor;

memory that stores information under the control of the processor; and

a computer program embodied on a computer readable medium in communication with the processor, the computer program including:

a code segment ~~logic~~ that obtains information identifying an item of merchandise that the user desires to purchase;

a code segment ~~logic~~ that determines a physical location of the user;

a code segment ~~logic~~ that queries a computerized network of information utilizing a query based on the information identifying the item of merchandise that the user desires to purchase and the physical location of the user;

a code segment ~~logic~~ that receives the customized offer for sale of an item of merchandise from a retailer-based agent in response to the query, the item of merchandise being offered for sale at a retailer proximate the user and being associated with the item of merchandise that the user desires to purchase; and

a code segment ~~logic~~ that displays the customized offer and a physical location of the retailer.

29. (Currently Amended) The apparatus of claim 28, further comprising a code segment logic that obtains information identifying a shopping list comprising a plurality of items of merchandise from the user.
30. (Currently Amended) The apparatus of claim 28, further comprising a code segment logic that queries a computerized network of information utilizing a query based on the information identifying the shopping list of items of merchandise and the physical location of the user.
31. (Previously Presented) The apparatus of claim 29, wherein said shopping list is generated by the user at a location remote from the retailer.
32. (Currently Amended) The apparatus of claim 28, further comprising a code segment logic that displays a list of items of merchandise available at the retailer and the prices associated therewith.
33. (Currently Amended) The apparatus of claim 28, further comprising a code segment logic that determines the closest retailers surrounding the user, and logic that suggests items of merchandise for sale at the closest retailers surrounding the user.
34. (Currently Amended) The apparatus of claim 28, further comprising a code segment logic that recognizes patterns to enhance the location of pertinent information.
35. (Currently Amended) The apparatus of claim 28, further comprising a code segment logic that alerts the user to the best local price.
36. (Previously Presented) A method for delivering purchasing information for sale of an item of merchandise from a retailer proximate a user, comprising:
 obtaining information identifying an item of merchandise that the user desires to purchase;
 determining a physical location of the user;
 automatically querying a computerized network of information utilizing a query based on the item information and the physical location of the user;

receiving the purchasing information from an agent in response to the query, the purchasing information including an offer for sale of an item of merchandise being associated with the item of merchandise that the user desires to purchase; and displaying the purchasing information.

37. (Previously Presented) The method of claim 36, further comprising parsing the item information based on predefined criteria to create the query.

38. (Previously Presented) The method of claim 36, further comprising displaying a list of items of merchandise available at the retailer and the prices associated therewith.

39. (Previously Presented) The method of claim 36, further comprising determining the closest retailers surrounding the user, and suggesting items of merchandise for sale at the closest retailers surrounding the user.

40. (Previously Presented) The method of claim 39, further comprising recognizing patterns to enhance determining the closest retailers surrounding the user, and suggesting items of merchandise for sale at the closest retailers surrounding the user.

41. (Previously Presented) The method of claim 36, further comprising alerting the user to the best local price.

42. (Previously Presented) A method for delivering a customized offer for sale of an item of merchandise from a retailer proximate a user, comprising:

- obtaining information identifying the item of merchandise from the user;
- determining a physical location of the user;
- querying a computerized network of information utilizing a query based on the information identifying the item of merchandise and the physical location of the user;
- receiving from a retailer based agent in response to the query the customized offer for sale of the item of merchandise from the retailer proximate the user;
- displaying the customized offer and a physical location of the retailer;
- determining the closest retailers surrounding the user; and

suggesting items of merchandise for sale at the closest retailers surrounding the user.

43. (Previously Presented) The method of claim 42, further comprising obtaining information identifying a shopping list comprising a plurality of items of merchandise.

44. (Previously Presented) The method of claim 43, further comprising querying a computerized network of information utilizing a query based on the information identifying the shopping list of items of merchandise and the physical location of the user.

45. (Previously Presented) The method of claim 43, wherein said shopping list is generated by the user at a location remote from the retailer.

46. (Previously Presented) The method of claim 42, further comprising displaying a list of items of merchandise available at the retailer and the prices associated therewith.

47. (Previously Presented) The method of claim 42, wherein the computerized network of information is the Internet.

48. (Previously Presented) The method of claim 42, further comprising alerting the user to the best local price.

49. (Currently Amended) An apparatus that delivers a customized offer for sale of an item of merchandise from a retailer proximate a user, comprising:

a processor;

memory that stores information under the control of the processor; and

a computer program embodied on a computer readable medium in communication with the processor, the computer program including:

a code segment ~~legie~~ that obtains information identifying the item of merchandise from the user;

a code segment ~~legie~~ that determines a physical location of the user;

a code segment ~~legie~~ that queries a computerized network of information utilizing a query based on the information identifying the item of merchandise and the physical location of the user;

a code segment logic that receives the customized offer for sale of the item of merchandise from a retailer based agent in response to the query;
a code segment logic that displays the customized offer and a physical location of the retailer;
a code segment logic that determines the closest retailers surrounding the user; and
a code segment logic that suggests items of merchandise for sale at the closest retailers surrounding the user.

50. (Currently Amended) The apparatus of claim 49, further comprising a code segment logic that obtains information identifying a shopping list comprising a plurality of items of merchandise from the user.

51. (Currently Amended) The apparatus of claim 49, further comprising a code segment logic that queries a computerized network of information utilizing a query based on the information identifying the shopping list of items of merchandise and the physical location of the user.

52. (Currently Amended) The apparatus of claim 50, wherein said shopping list is generated by the user at a location remote from the retailer.

53. (Currently Amended) The apparatus of claim 49, further comprising a code segment logic that displays a list of items of merchandise available at the retailer and the prices associated therewith.

54. (Currently Amended) The apparatus of claim 49, further comprising a code segment logic that recognizes patterns to enhance the location of pertinent information.

55. (Currently Amended) The apparatus of claim 49, further comprising a code segment logic that alerts the user to the best local price.

56. (Previously Presented) A method for delivering purchasing information for sale of an item of merchandise from a retailer proximate a user, comprising:
obtaining information identifying the item of merchandise from the user;
determining a physical location of the user;

Appln. No. 09/975,460

automatically querying a computerized network of information utilizing a query based on the item information and the physical location of the user;

receiving the purchasing information from an agent in response to the query;

displaying the purchasing information;

determining the closest retailers surrounding the user; and

suggesting items of merchandise for sale at the closest retailers surrounding the user.

57. (Previously Presented) The method of claim 56, further comprising parsing the item information based on predefined criteria to create the query.

58. (Previously Presented) The method of claim 56, further comprising displaying a list of items of merchandise available at the retailer and the prices associated therewith.

59. (Previously Presented) The method of claim 56, further comprising determining the closest retailers surrounding the user, and suggesting items of merchandise for sale at the closest retailers surrounding the user.

60. (Canceled)

61. (Previously Presented) A mobile shopping agent, comprising:
means for receiving from a user an input for a product desired to be purchased by the user;
means for locating at least one retailer being proximate the user and having an item of merchandise for sale that is associated with the desired product; and
means for displaying a customized offer for sale of item of merchandise for sale that is associated with the desired product and for displaying a location of the at least one retailer.

62. (Previously Presented) The mobile shopping agent of claim 61, wherein the means for receiving further comprises a means for receiving an input of a plurality of products.

63. (Previously Presented) The mobile shopping agent of claim 62, wherein the means for locating further comprises a means for querying a computerized network based on the plurality of products.
